AutoCAD Crack + Activator Download PC/Windows Latest

AutoCAD is used to draw and annotate 2D plans, architectural and engineering drawings, as well as 3D models. It is also used for mechanical design, architectural detailing and fabrication, and computer-aided mechanical design. The AutoCAD name was originally intended for the product Autodesk sold to the Xerox Corporation, which originally was a provider of mainframe CAD programs, but did not actually have their own desktop CAD. After the acquisition of Autodesk by Xerox, Autodesk decided to release a brand new product called AutoCAD as a desktop app, competing with their own existing product. Therefore, the name Autodesk was chosen for the new product.[2] In June 2016, Autodesk introduced a new name for AutoCAD product line: AutoCAD Architecture. Contents show] AutoCAD Architecture Features The 2018 version of AutoCAD Architecture offers: 1. Use Cases The first section of any AutoCAD Architecture is titled "Use Cases," this is essentially a list of all the tools, features, functions, and applications that can be used within Architecture. This section is designed to assist users in determining what they need to be used and when to use them. This year's version has five main sections: Home Introduction From its release in 1982, AutoCAD was sold and supported by its original developer, Autodesk. In 2015, Autodesk spun out its enterprise products to form the Autodesk brand. The Autodesk brand includes AutoCAD, AutoCAD LT, and AutoCAD Map 3D, as well as AutoCAD 360 and DesignSpark. In the last several versions, AutoCAD Architecture has undergone several changes in its visual appearance. The most noticeable change has been in the tabs that appear along the top of the user interface when not in use. In the 2010 version, the tabs were replaced with a red/blue/red color scheme. For 2013, the tabs were replaced with a red/blue/green color scheme. In 2016, the tabs were replaced again with a light and dark gray color scheme, and the tabs have been updated to reflect the new name of the product. In the Home tab, there are several modules. Each of these has a specific purpose and must be used to complete a task. The modules can be selected via the user interface or by selecting the Change Multiple

AutoCAD Crack

2011 Support for two and three dimensional drawing was introduced. In addition to 2D and 3D modelling, there is a new 3D application mode named 3D Preview. A "light" version was also introduced, and was available for free download for a period of time. This version could be run off a USB stick, and does not require installation. 2012 The Architectural command was removed. It can be found in the same area as tools, but is called "Architecture". The command is useful for the modelling and detailing of architectural models. In response to user complaints, the development team introduced a license restriction for new AutoCAD-based plug-ins. This was designed to avoid duplication of work on multiple versions of the same plug-in for different drawing applications. The new rule limited the number of AutoCAD installations that a third party can create plug-ins for at any one time. The Linux version of AutoCAD also received significant improvements in stability and performance. 2013 The ability to save a drawing in the edit or camera view in a specific direction. Also the ability to save a drawing on the current display, including saved-viewport when switching between multiple displays was added. The ability to save the current camera view in a Snap-to-Fit view was added. A watermark on drawings was added. The ability to create regions without the need to create regions and sub-regions to be able to create a closed surface. Inverse/mirroring was added. The ability to save a drawing in the edit view and view as the status bar was added. The ability to create drawings in a tree hierarchy was added. The ability to extract a vector object from a group was added. The ability to extract a closed surface from a group was added. The ability to save a drawing in the camera view to either a folder or desktop was added. The ability to save a drawing in either left-handed or right-handed document format was added. The ability to save a drawing in either a programmatic or user-defined crop was added. The ability to save a drawing in either an East or West or North or South crop was added. The ability to edit the speed setting for a drawing after it has been opened was added. The ability to show and hide templates was added. The ability to set the drawing scale was added. The ability to set the drawing scale in either a linear or relative ca3bf1094

AutoCAD Crack

Copy the keygen file to your active Autodesk Autocad install. Use the keygen to generate your own license and activation key. Install the licensed product and add the activation key to your C:\Program Files\Autodesk\AutoCAD\etc folder. Download the demo software from the Autodesk Autocad website. Install the demo software and log in. Activate the demo by logging in. Go to the home menu and select File > Change User Profile. Change your Autodesk Autocad user profile from Developer to User. Press the Enter key to save the changes. Go back to the home menu and select File > Change User Profile again. This time change it to Admin. Press the Enter key to save the changes. Go back to the home menu and select File > Change User Profile again. Change it to Admin a second time. Press the Enter key to save the changes. To view the license information, go to the home menu and select File > License Information. The demo contains full functionality. You can download the license and activation key for the demo software, but you will only be able to use the functionality found in the trial version of Autodesk Autocad. /* * Copyright 2009-2012 the original author or authors. * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of the License at * * * * Unless required by applicable law or agreed to in writing, software * distributed under the License is distributed on an "AS IS" BASIS, * WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. * See the License for the specific language governing permissions and * limitations under the License. */ package org.apache.ibatis.submitted.cache.injection; import java.lang.annotation.ElementType; import java.lang.annotation.Retention; import java.lang.annotation.RetentionPolicy; import java.lang.

What's New In AutoCAD?

Markup Assist enhances your ability to review, accept or reject comments from your team. Preview the comments and accept or reject them, edit the comments if needed, then incorporate them into your drawing. Nested Materials: Use all the tools of AutoCAD as objects within the same drawing. Use the new Object Manager to move, copy, rotate, scale and place any object, such as lines, and move them freely as if they were stand-alone, independent elements in your drawing. Symmetric views: Symmetric views, that represent a mirror image of the actual drawing, are now available for entire drawing sets, not just individual views. Updated Placement Manager: The new placement manager adds new search, selection, and cloning features for objects, components, and footprints. You can start a new AutoCAD drawing without writing down the command code. You can now use the Outline window as a fast and easy way to create a new drawing. You can also open existing drawings directly from the Outline window, and use Outline to quickly navigate to a specific drawing. You can also open a drawing by browsing for it in the Outline window. Drawing Templates: The Drawing Templates tool allows you to quickly create a new drawing with a template, and includes a set of useful drafting tools to help you start your drawing quickly. Bring your own code: With this release, you can now create a drawing from scratch. You can start with an empty drawing or use the Quick Start option to create a drawing from an AutoCAD drawing template, then design your drawing as you would any other drawing, and incorporate your changes. (See video: 1:55 min.) Exporting drawings with standards: The Export to DWG and DXF commands now support a variety of standards, including the 2007 version of the AutoCAD DWG specification. Predefined Ribbon: You can now use the Predefined Ribbon to quickly access frequently used commands and customize the toolbar in any drawing, and the ribbon across the entire system. Sharing updates and troubleshooting: You can now share selected drawings with colleagues via the new Desktop Sharing feature. Send drawings and AutoCAD files, and even CAD drawings from files such as SVG, PDF, DWG, DXF, and DWF, to colleagues.

System Requirements For AutoCAD:

Minimum: OS: Win 7/8 64-bit CPU: Intel i3, i5 or better Memory: 6 GB RAM Graphics: ATI Radeon HD 4650 or Nvidia GeForce 9800 GTX or better DirectX: Version 11 Storage: 4 GB available space Sound Card: DirectX compatible sound card Recommended: CPU: Intel i7, i9 or better Memory: 8 GB RAM Graphics: ATI Radeon R9 or Nvidia
