Licenses for AutoCAD are available both as standalone and site-based. The standalone licenses are for an installation of AutoCAD. Site-based licenses are for installation on a server, where the server is monitored and configured remotely by an AutoCAD Support Team member who can remotely add users and grant them access to AutoCAD. The site license also has the ability to automatically update the application, as well as service the software. It is managed by an AutoCAD Server Administrator. Autodesk also provides an annual maintenance subscription, Autodesk University and Autodesk Authorized Training Center licenses. Features AutoCAD is used in a variety of fields, including architecture, civil engineering, and industrial design. In commercial applications, AutoCAD is used for architectural and engineering drafting; 2D and 3D mechanical design; modeling; electrical and plumbing design; network and telecommunications design; drafting and design for the manufacture of automobiles, components, and systems. AutoCAD is used in large-scale global operations in transportation and heavy industry. It can be used by individuals to work on small- and medium-sized design projects, or by professionals in large businesses to create designs. AutoCAD is also used in content-creation applications, such as digital signage and kiosks. More than 18 million licenses for AutoCAD have been installed, with more than 30 million people using it. A July 2011 survey of 3,000 people showed that more than 90% of survey participants used AutoCAD. C++ classes can be used to: display 3D models from Autodesk Inventor; import, export, share drawing information; perform geometry analysis; view and perform workflows. Many of the plugins for AutoCAD Crack Mac, such as the "Draw" and "Drafting" plugins, are available in other CAD systems. Autodesk Data Management and Exchange (DME) data from the following systems is accepted in AutoCAD: DWG, DWF, DGN, DXF, and other drawing exchange formats. Recent versions of AutoCAD use a concept of "packages", which groups drawings in folders, allowing them to be inserted or "dragged-and-dropped" into other packages. The package feature has been greatly enhanced in AutoCAD 2010 and 2011. There are about 55,000 add-ons for AutoCAD. Many are available for free on the internet and in download repositories, while others are proprietary and sold for a subscription fee, which usually includes access to AutoCAD user guides, manuals, and other resources. History AutoCAD is based on the products CADLIX and System Add-in Technology (SAT), which were originally developed for Microsoft Office on the Macintosh platform. The original AutoCAD was an AD-1. For AutoCAD 2002, the user interface and CADLIX were integrated into a single package named "AutoCAD XL". The XL in the name was later removed, as XL is a registered trademark of Autodesk, and the company continued to use AutoCAD as the company name. For AutoCAD 2004, a new interface and CADLIX were introduced, now named "AutoCAD 2004". In 2007, for AutoCAD 2006, the XL was dropped from the name, and changed to "AutoCAD 2007". In 2007,

the first company-wide "Autodesk University" occurred, where 15,000 Autodesk employees received a one-week certificate in the use of AutoCAD. The same year AutoCAD got an award from The Independent Magazine for the Product of the Year. Autodesk has won dozens of awards in the product field of CAD, including the "Design ca3bfb1094
