28 Jan Adobe Portable Document Format (PDF) Reader, the file format in which you can view Portable Document Format (PDF) files, is now available for users of the new Nokia Asha 305/306/307/300. Below are some of the features of the application. I'm back home now, but when I got back everything was still so chaotic! I was really surprised that I was back home so quickly; I thought that the airport might have been closed when we left for the tour, however it was probably closed so we wouldn't be able to fly out! No matter! The guide also knew it was closed and said that we would be returning to the hotel for lunch, it was very very cool! The airport did close earlier than I thought, so when I got to the hotel I just show my documents to the guard and used the entrance, I used the same entrance twice before! When I got back into my room I was so happy to see my bed and my furniture still there, everything was still there, I wasn't in trouble! So the group split up, the tour guide and I went to the airport to pick up the other participants. I had been informed that two of the people in my group didn't make it to the airport, however, the tour guide said that when we got to the airport, the person that was to come to the airport with us had left. I was pretty disappointed when I heard that, however it was no problem, I wasn't really worried about it; I was pretty sure that she would turn up at the airport, I just wasn't sure whether she would be with the rest of us or not! Anyway, once we got to the airport, we walked from the airport exit to the connecting terminal, there was a little confusion with some other people and it took us around an hour to get to the connecting terminal, luckily we were told that the flight was leaving at 6:30 p.m. and we would
