PDF To Text Converter PC/Windows

PDF to Text Converter is a lightweight software application whose purpose is to help users convert PDF files to plain text file format using batch processing operations. It sports a clean and intuitive layout that allows you to configure the dedicated parameters with minimum effort. The program gives you the possibility to upload files into the working environment using the built-in browse function or “drag and drop” operations. On the downside, you cannot add the content of an entire folder to the list. PDF to Text Converter lets you start or stop the conversion process, remove the selected items from the list, select all files with just one click, as well as use hotkeys for a better control over the entire process. When it comes to configuration settings, you are allowed to pick the destination folder, make the utility convert all pages or only the user-defined ones, as well as insert page breaks in the converted document. Additionally, you can change the look of the program by selecting from different skins. Since it doesn't require much computer knowledge to work with PDF to Text Converter, even rookies can master the entire process with minimum effort. During our testing we have noticed that the tool carries out a task very quickly, provides very good output results, and no errors showed up throughout the entire process. As it would be expected from such a small utility, it leaves a minimal footprint on system resources, so the overall performance of the computer is not hampered. To sum things up, PDF to Text Converter seems to be the right choice in case you are looking for a simple-to-use yet efficient software application that helps you make conversion operations. It can be easily installed and configured by all types of users, regardless of their experience level. The biggest catch with PDF to Text Converter is the absence of a downloadable trial version, which is a bummer considering the fact that this is one of the best tools out there for the job. But if the utility is free, it still gets five stars, as we strongly recommend it to all users who need to convert PDF documents into text files.
